

3R to 3H to 3A Educational Confluence

The world's leading and disruptive educationists choose the 3R to 3H to 3A Educational Confluence for its aim to achieve "Contextual, Relevant & Experiential Higher Education." Taking place at HIAL, Ladakh, from May 23-28, 2025 (5 nights), this confluence will gather an international community of educators, representatives of non-profit and government organizations, and other stakeholders. Discussions will center on learning by doing, collaborative education, trans-disciplinary learning, and holistic and spiritual education in Higher Education.

About HIAL University

HIAL is dedicated to mountain development, striving to establish Ladakh as a model for sustainable economic living in mountainous regions. Its initiatives provide transformative educational experiences, create Centres of Excellence to demonstrate innovative approaches to education and environmental sustainability, and promote locally focused sustainable development.

Since April 2019, HIAL has run an Experiential Learning Fellowship, which began with 11 fellows and has now grown to 20. The Experiential Learning Project (ELP) enables fellows to develop solutions for mountain communities while gaining skills in strategic thinking, design thinking, problem-solving, teamwork, and project management.

About the Conference: 3R to 3H to 3A

HIAL promotes a shift from the traditional 3R's (Reading, wRiting, and aRithmetic) to the 3H's (bright Head, kind Heart, and skilled Hands). This confluence will further introduce the 3A's:

- ✓ Adhyatmika (Spiritual Dimension): Inner development, mindfulness, and ethical values.
- ✓ Adhibhautika (Material Dimension): Hands-on learning and real-world applications.
- ✓ Adhidaivika (Divine Dimension): Understanding interconnectedness and fostering unity and compassion.

By engaging experienced educationists from around the world, this event will build on HIAL's previous two education conferences and add fresh perspectives to Higher Education.

Theme of the Conference

Building on HIAL's "Learning by Doing" and "Collaborative Teaching" models, the confluence will emphasize contextual, trans-disciplinary, and experiential learning in Higher Education. Over five days, international experts will share experiences, exchange ideas, expand networks, and find inspiration.

Scope of the Conference

The five-day confluence will focus on making higher education experiential by designing curricula and pedagogies based on:

- ✓ Designing Futuristic Curricula – Contextual and trans-disciplinary approaches.
- ✓ Developing Innovative Pedagogical Tools – Experiential and immersive methodologies.
- ✓ Reclaiming Indigenous Wisdom – Integrating traditional knowledge into modern education.

Participants will also explore the relationship between spirituality and education through discussions on the 3A's. Apart from in-depth sessions, participants will visit scenic locations in Ladakh and SECMOL Alternative School Campus to experience alternative learning in practice.

Broad Itinerary

Date	Activity	Accommodation
May 23rd, 2025 (Day 1)	Arrival in Ladakh, acclimatization at SECMOL . Evening welcome meeting.	SECMOL
